

Making Simulation Effective

MAGMA Customer Success

MAGMA Customer Success ensures that **MAGMASOFT®** is not only used, but demonstrably **reduces costs**, **minimizes risks**, and **improves decision-making**. To achieve this, we will together develop a customized roadmap.

Technically sound. Systematically implemented. Tried and tested.

Reduced risk. **Reduced** costs.
Improved decision-making.

Your path to
measurable **success**.

Profitability:

- Less scrap and rework thanks to reliable simulation instead of trial-and-error
- Faster ramp-ups and shorter lead times thanks to pre-optimized processes
- An investment that pays off:
MAGMA ECONOMICS makes cost, benefit, and CO₂ levers both transparent and controllable

Organization & Implementation Reliability:

- Clear, structured introduction of **MAGMASOFT®** – from its installation to its deep integration within the company
- Structured skill development through qualification and on-the-job training for reliable long-term knowledge retention and quick increase in team productivity
- A dedicated contact person and tailored support ensure stable implementation in your processes

Risk & Robustness:

- Comparing simulation and reality reduces quality risks both in development and in series production
- Standardized processes and documented workflows reduce the dependence on individuals
- Management reviews make deviations visible at an early stage and allow targeted countermeasures to be taken

Strategic & Digital Lead:

- Simulation results are firmly established in the company – from the engineering level to the management
- Digital learning structures and communication tools ensure that know-how is built, applied, and remains sustainably available within the company
- The result: a foundry that continuously learns and bases decision-making on simulation rather than on gut feeling

Let's evaluate together the economic leverage that the **Customer Success Program** can unlock for your foundry.

In a compact, informed discussion, we will lay a solid foundation to build on – concrete, reliable, and specially tailored to your goals.

MAGMA – Establishing Simulation Effectively in Your Company.
